30 April 1949

- a. Between 24 and 30 April various Czechoslovak Army units have moved towards the German border, particularly in the Vseruby, Domazlice, and Mariánské Lázně areas. These troops are being used to cut ditches across highways, demolish minor bridges, and construct road blocks, some of the latter consisting of trees cut to leave four-foot trunks.

- b. Mines have been laid, the only known field being in the Prenet-Maxov area (N50/U79). (See Attachment II).

- c. As of observation date, there were approximately three infantry companies working on border defenses in the Prenet-Maxov area.

12 May 1949

- a. Concrete pillboxes are being constructed south of Polmava and east of the Domazlice road (N50/P70).

- b. "An important strongpoint" is being set up at Certuv Mlyn; concrete is being delivered there in large quantities. Troops employed in this work hide whenever anyone approaches from the German side.

- c. Troop units in this area are composed almost entirely of Slovak nationals. (Czechs are being sent to Slovakia for military service).

- d. Movements on the German side of the border are subject to air reconnaissance. On 4 May, an ME-108 crossed German territory twice; a STORCH observation plane was seen between Prenet and Ceska Kubice on 5 May.
